

VICTOR POLOZOV

Lead Software Engineer — C++ / Backend / Healthcare
victor.polozov@gmail.com | +972512435197 | linkedin.com/in/victor-polozov | Israel

EXECUTIVE SUMMARY

- Hands-on technical lead with 25+ years in software engineering, including C/C++, backend systems, mobile platforms, DevOps, and production healthcare software.
- Strong experience leading engineering teams, mentoring developers, and delivering scalable, secure, regulated systems with HIPAA/GDPR requirements.
- MSc in Mathematics and 10+ years teaching CS/SE; focused on clean architecture, system thinking, reliability, and pragmatic technical decision-making.

CORE COMPETENCIES

- Backend Architecture, C/C++ Development, Large Codebases, System Design, Reliability
- Technical Leadership, Mentoring, Agile Delivery, Engineering Practices, Code Quality
- Healthcare Software, Security, Compliance, CI/CD, Observability, AI-assisted Development
- **Languages:** C/C++, Ruby, JavaScript/TypeScript, SQL, C#/F#, Java/Kotlin, Python, Bash
- **Frameworks/Platforms:** Ruby on Rails, Node.js, React, .NET
- **DevOps & Tools:** Docker, TeamCity, AWS, Azure, Vault, Prometheus, Ansible, Git

EXPERIENCE

- **MedM Inc** 2014 – Present
Senior Software Engineer (Technical Lead) *Remote (US-based)*
 - Technical lead for a production remote patient monitoring platform, contributing across backend, mobile, architecture, security, and DevOps.
 - Designed and scaled HIPAA/GDPR-compliant backend systems integrating medical devices, EHRs, FHIR-like APIs, Garmin, Twilio, Stripe, App Store, and Google Play.
 - Led backend/full-stack engineering efforts: mentored developers, established engineering practices, reviewed designs, and resolved complex technical blockers.
 - Worked with large cross-platform codebases including C/C++ components, mobile SDKs, offline-first synchronization, and customer-specific application builds.
 - Improved reliability and delivery quality through CI/CD automation for 200+ projects using TeamCity, Docker, Ansible, Vault, and Git-based release processes.
 - Built observability and operational tooling with Prometheus, Grafana, Alertmanager, cloud alerts, and error tracking to support significant infrastructure growth.
- **Lanit-Tercom** 1999 – 2014
Senior Developer & Compiler Engineer *St. Petersburg, Russia*
 - Developed compilers, translators, and enterprise migration tools in C++, F#, PL/SQL, and related technologies.
 - Automated MSSQL-to-Oracle translation, reducing migration effort by approximately 10x compared to manual rewriting.
 - Built compiler optimizations and code generation tools, including DFA-based analysis and COBOL/Java generation using yacc, JCL, and C++.
 - Contributed to enterprise, healthcare, education, and simulation projects for customers including BluePhoenix, FOSS, dbMotion, Relativity, and McGraw Hill.

EDUCATION & TEACHING

- **Saint Petersburg State University** 1998 – 2003
MSc, Mathematics and Mechanics Faculty *Thesis: Semantics and AST Transformations*
- **Assistant Professor** 2006 – 2015
Saint Petersburg State University *Russia*
 - Taught Formal Languages, Programming, Functional Programming; mentored thesis projects
 - Curriculum curator; SPISOK conference co-organizer (2011–2014)

LANGUAGES

- English (Fluent), Russian (Native), Hebrew (Intermediate)
